

Active Ingredient: Chlorothalonil
Formulation Type: Water Dispersible Granules

Echo® 90WSP is a dry chlorothalonil fungicide in convenient water-soluble packaging that delivers broad-spectrum, contact protection on a wide range of labeled field, vegetable, fruit, nut, and specialty crops. Each pre-measured packet contains 90% active ingredient, giving you a high-load formulation that's easy to handle, store, and mix while providing strong preventative control of key foliar diseases.

Weed Control

Echo® 90WSP is a multi-site contact fungicide (FRAC Group M5). After spraying, the deposits stay on the plant surface and interfere with several basic enzyme systems in fungal cells, stopping spores from germinating and slowing further growth. Because it acts on multiple biochemical pathways, the risk of resistance is lower, making it a strong foundation in resistance-management programs and an excellent tank-mix partner. Echo® 90WSP helps protect against a broad spectrum of diseases listed on the label, including many common leaf spots, blights, rusts, and mildews.

Crops that Benefit

Beans (Dried/Snap), Blueberry, Cabbage, Carrot, Celery, Conifers, Corn, Cranberry, Cucurbits, Filberts, Garlic, Onion, Parsnip, Peanut, Potato, Soybean, Stone Fruits, Tomato, Check label for the full list of registered crops that benefit from Echo® 720.
